

FINANCIAL TALENTS WANTED!

Index Intelligence GmbH is an independent provider of index and benchmarking solutions. With modern index solutions and associated data management, we offer cost-effective solutions as alternative to the established providers. Our data range includes classic index products (equities, fixed-income, derivatives) as well as alternative asset classes.

In order to accelerate our successful growth, we are now recruiting an

INTERN (f/m/d)

FINANCIAL DATA ANALYST / DATA QUALITY

Location Dresden

Your role

- Run and improve quality control processes of securities data and prices
- Co-develop a quality assurance system (Artificial Intelligence)
- Monitor transfer of data to the existing production operation
- Run and lead projects to continuously improve existing processes and procedures

You will start with a product training at our headquarters in Frankfurt. After 8 weeks you will be ready to excel at our office in Dresden.

Our offer

- Familiarisation with the securities markets in several countries
- In-depth knowledge of selected local markets and locally issued instruments
- Practical experience using Microsoft SQL-Server and Excel
- The opportunity for your personal and professional development with a steep learning curve
- The opportunity to work independently on varying and challenging projects in the interesting field of stock and bond indices in international securities markets
- Collegial working atmosphere and fun at regular company events

Did we raise your interest? Contact us! Send your application documents (cover letter, CV, references) and your earliest possible starting date by e-mail to career@index-int.com. Your contact person is Katja Kölker.

YOUR SKILLS

- reading mathematics / economics / business administration
- Fluent in English and advanced in German
- Basic knowledge in financial mathematics
- Highly interested in international stock and bond markets
- strong analytical skills and a problem-solving mindset
- 6 months internship with adequate remuneration

«If you are authentic, inquisitive and committed, you will always be on the winning side when starting your career. If you are keen on financial mathematics and data analysis and want to delve deeper into the world of equity and bond markets, then you will be at the right place in our company»

Become part of our dynamic and international team. Support us with your commitment and improve our performance with your ideas!
